Name: _____

Addition

In each story, there are numbers of items. Circle the numbers you see in each problem, then add them together to solve the word problem

Example:
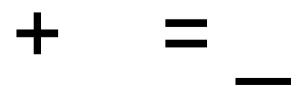

Haley has (3) cats that play in her backyard. The next day, there were (2) more cats. How many cats were there all together?

$$3 + 2 = 5$$

Noah ate 4 chicken nuggets. He decided he was still hungry and he ate 2 more chicken nuggets. How many chicken nuggets did Noah eat?
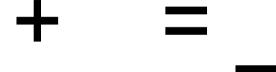

$$\_\_ + \_\_ = \_\_$$

Addition

In each story, there are numbers of items. Circle the numbers you see in each problem, then add them together to solve the word problem

Ben invited 2 friends to come to his house to play. His mom said he could invite 1 more friend. How many friends can Ben invite?

$$+ \quad = \_$$

Zara has 7 friendship bracelets. She is working on 3 more. How many will she make all together when she is done?

$$+ \quad = \_$$
